This game is a fantastic throwback to classic rpg's. Everything from the depth of the game, to the importance of character development, but as with many classic rpg's this game lacks interesting combat. After a short while combat becomes more of a chore than a gratifying experience. The character interactions, inventory system, character leveling, and ingenious dungeon layouts more than make up for this, however. This game really shines in the arena of the completionist. There is just so much to do in the game that even after 12 hours of gameplay, I still hadn't left the first continent. The art is, for the most part, acceptable. The level design for towns is it's strongest aspect. In combat backgrounds and character models tend to repeat themselves ad nauseum. Having choices as to how to play the game (six difficulty settings, encounter frequency, and an option to omit cutscenes) really alleviates some of the monotony of combat and adds to the replayability of the game. The game also boasts two different "New Game" options after beating it the first time. Overall, I would give this game an 8/10.. Very enjoyable, an essential part of a Dungeon Warfare & Orcs Must Die collection.. It was very cute. I like the art style and the characters' personality through out the rather short tale. However, I feel as though there could have been more added to it, instead of just fastforwarding through the months. It honestly felt like I was just watching an episode of an anime. There was little interactions between the heroine and her forced love. There was a strong lack of any connection you feel between the characters. It felt like the makers had an idea and then rushed it. In my personal opinion I feel like the art saved it for me.

If you do buy this, you're paying for the art and story, not gameplay.. windows mixed reality support update please =( Please please please =(  
the game opens but  
direction keys do not work. i can finally scream KovaaKs when i w-key or laser some bots.. How to launch this addon? Bought it, but can not launch it.. Awe of Despair is lacking focus, design, and polish. I am highly disappointed with this game.

A meh story to be honest. wooden crap is a better name.. I beat the 30 levels in under an hour, most of the levels are fairly easy but some of them are extremely hard.. Just like UBERMOSH's soundtrack, this one is also great!. Needs a lot more people, I would totally play it if it was free to play :/. Refund requested.

Good concept with fitting graphics for the overall design, but the present game is terrible to play, even with a controller.

You can turn the music off. However, you have no control over the camera which bounces around as if held by a drunk, second-rate film producer who can't afford to pay someone who knows what s/he is doing.

On top of that, sometimes the zombies seem impervious to being struck with chairs, laptops, or whatever until about the third or fourth hit. Not that I could hit them most of the time because I was so seasick. When I did connect, I killed a few zombies, easily pushed many away, and then died because my character is more fragile than the objects I was able to grab off desks.

The devs should seriously consider revamping the Last Hours of Jack so the player can control more aspects of the game, especially the POV/FOV and maybe the durability of their make-shift weapons. That would go a long way toward making this game playable - perhaps even enjoyable.. Hey guys what can i say I love this game its a fast pace bouncy platformer shootumup dodge game. It has great music and is a hella lot of fun check out my video of the game.

Also the devs are amazing .

<https://www.youtube.com/watch?v=vbryl6Z4GvY>. I dont even know where to start oh wait yes i do a refund. Nostalgia from childhood! Great game with great story.. I just adore the view of the route. A small route with great detail and nice for a smooth ride to relax. However the 57xx panier (locomotive) is terrible, I can't raise speed more than 25mph without running out of pressure on the boyler and it's very hard to go up hills with it to complete missions on time. Thank god I bought this on sale...
